

Mobile Wallet

Make faster, more secure and contactless payments by saving your Pinnacle | Health & Benefits debit card in a mobile wallet on your compatible mobile device. A mobile wallet keeps your information secure by creating a token, or random identification number, and transmitting it to the merchant instead of your actual debit card number. It eliminates the need to carry the physical plastic card, which can be misplaced.

Mobile wallets include Apple Pay, Samsung Pay and Google Wallet. Once your card is loaded and validated, you can open the app on your phone, select your Pinnacle | Health & Benefits debit card, and use it for contactless payments at point-of-sale terminals that accept them.

Just like when you use your physical Pinnacle | Health & Benefits debit card, you can only use it for eligible expenses, and the funds will be deducted from the appropriate account (HSA, FSA, Dependent Care, QTA, etc.) based on expense type.

Getting Started

Step 1: Add

Add your Pinnacle | Health & Benefits card to the digital wallet on your mobile device.

Step 2: Pay

Pay by holding your mobile device near the reader at participating merchants.

Step 3: Manage

Manage your virtual card and control access in Apple Pay[®], Google Pay[™] and Samsung Pay.
